Dedications	iii
Our Contract with You, The Reader	v
Acknowledgements	xxi
About the Author	xxv
How to Download the Files	xxvii
Introduction	xxix
Chapter 1: Deployment Fundamentals	1
<hr/>	
What is deployment?	1
Installation is only part of deployment	4
Pre-implementation	4
Implementation	5
Post-Implementation	5
Why you should care (why it is so important to get it right!)	5
Do I need a Setup?	6
A basic checklist for deploying Visual FoxPro apps	7
VFP Source Code issues	7
Customer environment	10
Application specific testing	10
Network and Operating System issues	11
General hardware requirements: What do you need physically besides VFP to deploy a solution?	12
Can't avoid this: What you must include for deployment	14
Can't touch this, or can you?	16
Conclusion	22
Chapter 2: Planning for Success	23
<hr/>	
Computing Environment	23
Workstation inventory	23
OS Platforms	27
Networking	33
Database platforms	35
Integration with other applications and technologies	36
Internet connectivity	39
Physical office layout	39
Need to order new equipment	40
Dealing with the unexpected	40
Clients	40
Dealing with customers	41
Working with subject matter experts	44
Talking to the real or end users	44

Handling those “special case” customers	45
Preparation	46
Images	46
EXE version details	49
Training materials for end users	49
Training materials for support staff	50
Duplication	50
User communication	50
Determining ship readiness	51
Requirements	51
Feature sets	52
Prototypes	52
Preparing customers for testing	53
Delivery dates	53
Sign-on	54
Conclusion	54
Chapter 3: Packaging the Installation	55
When is it ready?	55
Getting ready for delivery	55
Testing	56
Executable components	57
Help	59
Data conversion	59
Visual FoxPro runtimes and dependencies	60
Third party controls and libraries	63
Organizing the setup	64
Directories	65
Installation schemes/feature sets	67
How do you package the install?	69
OS and third party components	69
Utilities to consider shipping	70
Delivery mechanisms	73
Diskettes	74
Zip/Jaz/SuperDisk disks	75
Memory sticks	75
CD-ROM and DVDs	75
E-mail	78
FTP	78
Web site downloads	78
Symantec’s pcAnywhere	79
Terminal Services and Citrix	81
Conclusion	82

Chapter 4: Setup Tool Roundup	83
What is a setup	83
What features are available?	84
What tools are available?	85
ActiveDelivery	85
Ghost Installer Studio	86
Inno Setup	88
InstaFox	89
InstallShield	90
Setup Factory	92
Tarma Installer	93
Wise Solutions	95
Why are the current installer tools better than the VFP Setup Wizard?	96
Deployment Tool Selection Process	97
Products Considered	99
Making the choice	99
Conclusion	102
Chapter 5: Windows Installer Inside and Out	103
Overview of Windows Installer	104
The evolution of software installation	104
The arrival of Windows Installer	105
Windows Installer Design Objectives	106
Working with Windows Installer	109
Structure of a Windows Installer setup package	112
Features and components	113
Merge Modules	115
Inside an MSI file	116
GUIDs, GUIDs, everywhere a GUID	129
Updates, upgrades, and patches	133
New bits for old	133
Small updates	134
Minor upgrades	136
Major upgrades	137
Patches	141
What happens when I run setup.exe?	142
The setup launcher program	142
MSIEXEC – the Windows Installer executable program	142
Install sequence	146
Caching the MSI file	147
Versioning rules during installs	147

Some common problems and what to do about them	149
Another version of this product is already installed	149
The feature you are trying to use is unavailable	150
I want my application to be available to all users	152
The Windows Installer Clean Up Utility	153
Conclusion	153

Chapter 6: Workstation and Traditional LAN	
Applications Step-By-Step	155
<hr/>	
Single workstation—Single-user	155
Single workstation with multiple-users	156
Local Area Network—multiple-user	159
Stories	159
General implementation issues	161
Security	161
Executables	162
Data	165
Configuration file (FPW)	166
Temporary files	167
Other configuration settings and Registry	168
Runtimes	169
Shortcuts	169
ActiveX controls and COM objects	171
Automation	173
ODBC DSN	173
FoxTools and other FLLs	175
Help files	176
Reports	176
Native Visual FoxPro (FRX)	176
Crystal Reports	178
Generating a setup, step-by-step	184
Step 1—Organizing your setup	185
Step 2—Specifying files deployed	187
Step 3—Configuring the target computer	191
Step 4—Customizing the setup steps	192
Step 5—Defining setup requirements and actions	195
Step 6—Building the install package	196
What can go wrong during a deployment?	198
Implementation	199
Application	199
Environment	200
Conclusion	201

Chapter 7: Client/Server Applications Step-By-Step	203
Stories	204
Performance is king	204
Indexes still matter	205
Security fundamentals from school of black and blue	205
General implementation issues	206
Installing a new backend database	206
Restoring a backup	207
Running a script to create the database and database objects	208
Using SQL-DMO	210
Data Transformation Services (DTS)	212
MSDE vs. SQL Server	215
Installing MSDE	221
Database Administrators and security	223
Generating a setup, step-by-step	223
Step 1—Organizing your setup	224
Step 2—Specifying files deployed	225
Step 3—Configuring the target computer	228
The rest of the story	229
What can go wrong during a deployment?	230
Implementation	230
Application	230
Environment	231
Conclusion	231
Chapter 8: Release and Post-Release Tips	233
Checklist/Instructions	233
Test area	234
Backups	235
Runtimes	235
Configuration files & registry	236
Update structures and indexes	236
Data conversion	236
Test	237
Notify the customer	237
Technical support	239
Communication mechanisms	240
Frequently Asked Questions (FAQ)	240
Help file	240
Training	241
Web site	241
Considerations for small shops	242

Post implementation	243
Post-mortem review	243
Customer follow-up	245
Bug tracking	246
Developer review	249
Post release party	249
Bonus pool	250
Conclusion	251
Chapter 9: Support and Ch-Ch-Changes	253
Support	253
Recovering corrupt or lost data	253
Visual FoxPro database structures and maintenance	256
SQL database structures and maintenance	258
Runtime command window	262
Ch-Ch-Changes	264
What needs to be updated?	264
Update architecture	266
Version numbers	267
Upgrade installs	268
Uninstalling	271
Conclusion	272
Chapter 10: Security	273
Data security	273
Application security	274
Source code security and decompilers	275
How we tested the decompilers	277
ReFox MMII	278
yRecover	280
Others	282
HTML Help files	283
Conclusion	285
Chapter 11: The What and Why of 'Wares	287
What is shareware?	287
What is freeware?	289
Demoware	290
Crippleware	291
Nagware	292
What is vertical market?	292
What is custom?	293

Prototype—friend or foe?	294
What is limited licensing?	295
Deployment and support considerations	296
Conclusion	297
Chapter 12: Legalese	299
<hr/>	
Computer Law Terminology 101	301
Intellectual property	301
Copyright	301
Creative/Original work	301
Derivative work	302
Work for hire	302
Exclusive rights	302
Copyrights for software developers	302
Securing copyright	302
Length of protection	303
Transfer of copyright	303
Exclusive rights	304
Fair Use	305
Digital Millennium Copyright Act of 1998	306
Display the copyright in the software and during installation	306
The contract	308
What is a contract?	308
Why do we need a contract?	308
Who should supply the contract?	309
What could go wrong with a handshake?	311
Contract clauses	311
The static contract clauses	312
Parties	312
Ongoing support	312
Ownership—who owns what?	314
The five types of program code	314
Source code options	315
What are my licensing options?	315
Confidentiality	317
Non-Compete	317
Guarantees	318
Client responsibilities	319
Acceptance clause	320
Contract termination methods	320
Settling disputes	320
Severability	320
Extension conditions	321
Governing law	321
The dynamic contract clauses	321
Definition of services	321

Project scope	321
Payment schedule	321
Exceptional expenses	322
Support clause	322
Licensing issues	323
Licensing your product	323
Per user license	324
Per machine license	324
Volume licensing	324
License enforcement	324
Licensing third party products	325
Summary	325
Top 5 lessons learned	325
Links	326
Conclusion	326

Appendix A: How To: InstallShield Express 329

What is InstallShield Express?	329
How do I install InstallShield Express?	329
Installing ISX VFP LE	330
Installing the VFP runtime redistributable files	331
Upgrading from ISX VFP7 LE to ISX VFP8 LE	331
InstallShield Express—Visual FoxPro Limited Editions	332
VFP 7 Edition	332
VFP 8 Edition	333
InstallShield Express—Full Version	334
Creating a setup package with InstallShield Express	335
The Sample Application	335
Creating a new InstallShield Express project	335
Using the InstallShield Express IDE	342
Building the setup package	356
Deploying the application	358
Creating a patch with InstallShield Express 4.0	360
Overview	360
The QuickPatch project wizard	361
The QuickPatch IDE	362
Deploying the patch	366
Conclusion	366

Appendix B: How To: Wise for Windows Installer 369

What is Wise for Windows Installer?	369
Creating a setup package with Wise for Windows Installer	369
The Sample Application	370
Creating a new Wise for Windows Installer project	370
Using the Installation Expert	371

Project Definition group	372
Feature Details group	376
Release Definition group	390
Building the deployment package	394
Compiling the project	394
Testing the setup	395
Running the setup	395
Distributing the setup	395
Upgrades and patches	397
Creating an upgrade	397
Creating a patch	400
Conclusion	403
Appendix C: How To: InstaFox	405
<hr/>	
About InstaFox	405
What is the InstaFox Wizard?	406
What is the InstaFox Installer?	407
Creating a software installation process with InstaFox	407
Installation Folder Setup	407
The InstaFox Wizard	409
The InstaFox Wizard Table Structures	419
Installing the Application	421
Welcome screen	422
License Agreement	422
Destination Directory	423
Application Shortcuts	424
Additional Tasks	424
Selected Installation Options	424
Cancelled Installation	425
Post Installation Information	425
Customizing InstaFox	425
Customizing the InstaFox Installer	425
Customizing the InstaFox Wizard	427
The InstaFox copy file behavior	428
Resources	428
Conclusion	428
Appendix D: How To: Inno Setup	429
<hr/>	
About Inno Setup	429
Creating a new Inno Setup script	430
Structure of an Inno Setup script	436
Setup section	438
Tasks section	438
Files section	439
Icons section	439

Run section	440
Other sections	440
Adding the VFP runtime libraries and other dependencies	441
Completing the script	443
Compiling the script	445
Installing the application	446
Welcome screen	446
License agreement	446
Information before install	446
Destination directory	448
Start menu folder	448
Additional tasks	448
Ready to install	450
Information after install	451
Setup completed	451
Silent installs	452
Pascal scripting	453
Resources	453
Conclusion	453
